Description

Google Jobs

Job Title: Network Engineer

Location: A.I. Staff Colony, Mumbai

Job Summary: Google, a leading technology company, is seeking a skilled and dedicated Network Engineer to join our team in A.I. Staff Colony, Mumbai. As a Network Engineer, you will play a crucial role in designing, implementing, and maintaining the network infrastructure to support our operations. Your expertise in network technologies, problem-solving abilities, and attention to detail will contribute to the reliability and efficiency of our network systems. This is an exciting opportunity to work with cutting-edge technologies and be part of a dynamic team.

Google Careers

Responsibilities:

1. Network Infrastructure: Design and implement network solutions, including LAN, WAN, and data center networks. Evaluate network requirements, capacity planning, and traffic analysis to ensure optimal performance and scalability. Configure and troubleshoot network devices, such as routers, switches, and firewalls. Collaborate with cross-functional teams to support network deployments and resolve network-related issues.
2. Network Security: Implement and maintain network security measures to protect against unauthorized access and potential threats. Monitor network traffic and perform regular security audits. Collaborate with security teams to ensure compliance with company policies and industry best practices. Identify vulnerabilities and recommend appropriate security enhancements.
