Description

Capgemini Career 2023

Capgemini, a global leader in consulting, technology services, and digital transformation, is seeking a skilled and experienced Mulesoft Developer to join our team. As a Mulesoft Developer, you will be responsible for designing, developing, and implementing Mulesoft-based integration solutions for our clients. This is an exciting opportunity for individuals with strong technical expertise in Mulesoft and a passion for building scalable and robust integration solutions.

Capgemini Careers

Responsibilities:

1. Solution design and development: Collaborate with clients and internal teams to gather requirements and design Mulesoft-based integration solutions. Develop scalable and efficient integration architectures, APIs, and connectors using Mulesoft Anypoint Platform. Ensure adherence to best practices, standards, and guidelines for Mulesoft development.
2. Integration implementation: Build, configure, and deploy Mulesoft applications and integration flows to support data integration, API management, and service orchestration requirements. Perform unit testing, system testing, and troubleshooting to ensure the quality and reliability of integration solutions. Collaborate with QA teams to ensure proper testing and quality assurance processes.

3. Technical documentation and support: Create comprehensive technical documentation, including design specifications, deployment guides, and user manuals. Provide technical support and guidance to clients and internal stakeholders throughout the development and implementation phases. Participate in code reviews and provide feedback to improve code quality and maintainability.

Capgemini Jobs Near Me

Skills and Qualifications:

1. Mulesoft expertise: Strong hands-on experience with Mulesoft Anypoint Platform, including Mule runtime, DataWeave, API Manager, and connectors. Knowledge of Mulesoft integration patterns, APIs, and deployment strategies. Familiarity with Mulesoft best practices for performance optimization and security.
2. Integration and API development: Proficiency in designing and developing RESTful and SOAP-based APIs using Mulesoft. Strong understanding of integration patterns, message routing, and transformation. Knowledge of web services standards and protocols (XML, JSON, SOAP, REST, etc.).
3. Programming and scripting: Strong programming skills in Java and/or other object-oriented languages. Familiarity with scripting languages such as JavaScript or Groovy. Knowledge of SQL and database concepts.
