Wipro Careers

Responsibilities:

1. Game Development: Design and develop interactive and engaging games using industry-standard game engines and programming languages. Collaborate with the game design team to understand game concepts, mechanics, and specifications. Implement game functionality, including graphics, animations, audio, and user interfaces. Ensure smooth gameplay, optimize game performance and debug and fix issues as needed.
2. Programming and Scripting: Write clean, efficient, and maintainable code to implement game features and functionality. Utilize programming languages such as C++, C#, or Java, and scripting languages like Python or Lua.

APPLY NOW

Integrate game assets, including 3D models, textures, and audio, into the game engine. Implement game logic, physics, artificial intelligence, and other game systems.

3. **Quality Assurance and Testing:** Conduct rigorous testing and debugging of games to identify and fix defects, ensuring a high level of quality and functionality. Collaborate with the quality assurance team to create and execute test plans, verify bug fixes, and optimize game performance. Continuously iterate and improve game features based on user feedback and testing results.
